

Introducing NEO Find from Caelo Software

Finding emails: how it should be!

All your emails at your fingertips – lightning fast

Also difficult to find your emails in Outlook?

Although Outlook is a very powerful program, most users find it hard to quickly retrieve older emails once they are stored away in a filing system.

NEO FIND is designed to fill this gap providing a highly innovative Email Find solution.

NEO FIND organizes all emails automatically in the most logical and intuitive way people think about their messages: around the correspondent involved in the email communication. Adopting Caelo's patented virtual folder structure all emails (both sent and received) are organized in a Correspondent folder. This folder can be searched or filtered to quickly zoom-in on the message needed.

Never without your messages anymore – they are at your fingertips all the time.

Stop searching, start finding your emails!

Full control over all your emails!

NEO Find provides a revolutionary approach to truly solve your email retrieval issue.

Combining Caelo's award-winning technology with automatic email organization around all Correspondents for both sent and received emails, NEO Find delivers the most natural and intuitive way to look for your emails: just select the correspondent you are looking for and all your messages are there. Zoom-in by performing a Search in Correspondent or by applying a Filter and your email is retrieved within seconds.

NEO Find: The only tool available which is **not searching** your emails but is automatically **organizing them** so you can find your emails where you expect them to be.

How NEO Find puts every mail at your fingertips

Feature

Automatic organization using virtual folders

Seamless integration with Outlook

Covering all message stores

NEO's power search

Filter toolbar

Runs comfortably in the system tray

Your Benefit

Correspondent folders are automatically created and maintained for every person you communicate with – no need to search for your emails, they are where you expect and need them to be.

While using Outlook to manage your emails, you can find your emails extremely fast and easy using NEO Find. Once you have located your message, you can reply to, forward or open the email in Outlook, open the containing folder or drag it to a new email as attachment.

All message stores are organized into one large transparent area. No email remains uncovered. Supports also IMAP stores.

Well known from Caelo's NEO Pro product now also available for Outlook users providing lightning fast results

Different filters reducing even further returned results.

When not needed, NEO Find hides comfortably in the system tray available with just a single click. NEO Find can be configured to start already minimized in the tray keeping track of all your emails as they are being handled by Outlook.

Four easy commands to quickly get to your message

Find Correspondent / Search in (Correspondent) Folder / Search for Conversation / Full Search

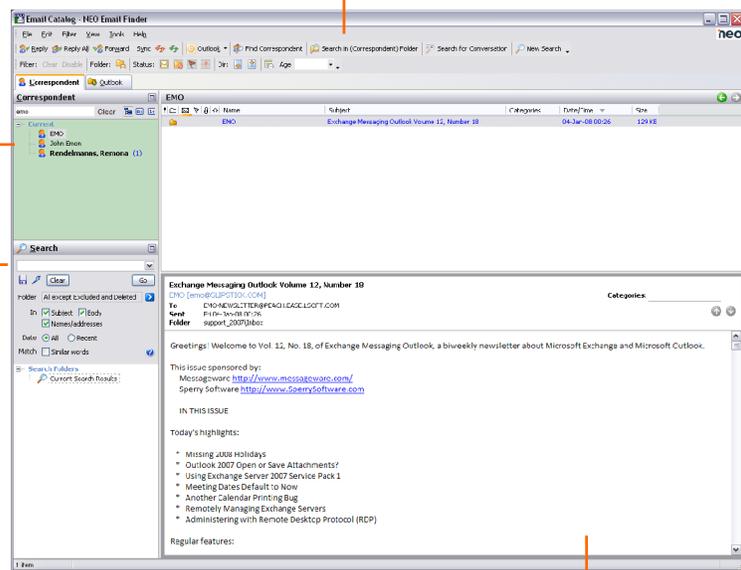

Automatic Correspondent Folders

Just enter (part of) the name of your correspondent and all your emails are there (both sent and received)...

...combined with Search in Folder

...to quickly find what you are looking for.

Or launch from here a full search throughout the entire Outlook system providing lightning fast results

Reading Pane to preview the message

Reply to or forward the message, open the message in Outlook, jump to containing Outlook folder or drag to a new email as attachment
